MERION SYSTEMS

Capability Statement

Custom software for government and public-sector organizations, built and supported from Colorado.

COLORADO, UNITED STATES

CORE CAPABILITIES

Custom software development
Applications built around the way your team actually works.

Backend & API engineering
Services and integrations that let your systems talk to each other.

Application modernization
A path off an aging system without a risky all-at-once rewrite.

Database & data systems
Databases and reporting that make your data usable by the people who need it.

Cloud & DevOps
Infrastructure and deployments your team can run without us.

AI-enabled applications
AI where it solves a specific problem, with a person checking the output.

Maintenance & support
Ongoing care for the systems you depend on, whether or not we built them.

WHO WE SERVE

State and local government agencies, federal prime contractors, and nonprofits and other public-sector organizations.

DELIVERY PRINCIPLES

Direct
You work with the engineer doing the work, not an account manager.

Written down
Scope, cost, and what finished looks like are agreed before work starts.

Handed over
Documentation, tests, and an operations handoff come with every project.

RELEVANT NAICS

541511
Custom Computer Programming Services

541512
Computer Systems Design Services

541519
Other Computer Related Services

Service alignment only; not a claim of registered NAICS codes.

CONTRACTING & COLLABORATION

We take on direct projects and ongoing maintenance for agencies, and subcontract to prime contractors who need engineering capacity. Confirm registration details, identifiers, and eligibility with us before an award.

Principal experience is earned at other organizations and is distinct from Merion past performance. No company project profiles are published yet.
